

MOBILE MOUTHGUARDS WILL BE ATTENDING WILLOUGHBY ROOS TRAINING AT WILLOUGHBY PARK ON THURSDAY MARCH 2nd from 5-7pm TAKING DIGITAL SCANS FOR CUSTOM MOUTHGUARDS

Who are we and what do we do?

Mobile Mouthguards was established in 2010, to provide top quality custom mouthguards for all levels of athlete, from the aspiring athlete to top level athletes competing in the professional arena. Mobile Mouthguards creates custom mouthguards for NRL teams, professional fighters, local sporting clubs and schools around Australia, providing our athletes with the best custom fit, comfort and quality available to protect teeth from damage and preventing trauma that can be caused by contact sport. Mobile Mouthguards currently creates custom mouthguards for the following teams:

At Mobile Mouthguards we take an impression (this can be digital) of the athlete’s teeth at your location, create a custom model of the teeth, construct the custom mouthguard to the custom model at our dental laboratory, and deliver it to the athlete.

Why Choose A Custom Mouthguard?

Custom mouthguards provide over 10 times greater protection to the standard boil and bite “chemist bought” mouthguard. Our mouthguards prevent tooth damage such as chipping, breaking or complete loss, as well as protecting the jaw. Custom fit mouthguards can also assist in preventing concussion due to their fit, design and quality.
